Professional Summary

DevOps and Cloud Engineering professional with hands-on experience automating cloud infrastructure, building CI/CD pipelines, and deploying containerized applications on AWS and Kubernetes. Delivered a DevOps internship covering infrastructure provisioning, monitoring, and deployment automation, plus an international virtual internship applying Power BI analytics and deployment planning for a global stakeholder. Skilled in Terraform, Docker, Kubernetes, and cloud monitoring tools, with a strong focus on automation, reliability, and scalable system design.

Technical Skills

Cloud Platforms: AWS (EC2, EKS, S3, VPC), Microsoft Azure, Google Cloud Platform (GCP), hands-on cloud sandbox labs (AWS/Azure/GCP)

Infrastructure & Provisioning: Terraform, Ansible, Linux (Ubuntu, Debian), Server Hardening, Bash Scripting

Containers & Orchestration: Docker, Kubernetes (EKS), Helm

CI/CD & Automation: Jenkins, GitHub Actions

Monitoring & Observability: Prometheus, Grafana, Alertmanager

Networking & Security: TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, Subnetting, VPC Peering, Firewalls, Reverse Proxy (Apache)

Web & Server Administration: Apache2, Nginx, Certbot, WordPress, Virtualmin

Programming & Databases: Python, HTML, CSS, PHP, MySQL

Tools & Productivity: Git, GitHub, Power BI, draw.io (AWS Architecture Design), GitHub Copilot

Professional Experience

Education New Zealand – International Virtual Intern (Client: New Zealand Cricket) Sep 2026 – Present
Remote

- Selected for an international virtual internship, partnering with New Zealand Cricket on a real-world business analytics engagement.
- Designed Power BI reporting solutions to translate business requirements into stakeholder-focused insights, and owned the deployment planning and technical implementation approach for the solution – covering data connectivity, scalability, and transition to the client's environment.
- Collaborated with overseas stakeholders through regular meetings and feedback cycles, building experience in international client communication and data-driven decision-making.

Data Ingenious Global Ltd. – AI/ML Intern May 2026 – Jul 2026
Jaipur, India

- Cleaned and organized tabular datasets (Python, Pandas) across multiple CSV files, including null handling, filtering, and sorting operations.
- Developed Python utility scripts to automate reading, formatting, and exporting structured data, reducing manual data-prep effort.
- Managed version control on GitHub, handling routine commits and maintaining clean repository documentation.

Dotsquares – DevOps Intern May 2025 – Jun 2025
Jaipur, India

- Provisioned and managed AWS infrastructure (EC2, EKS) using Terraform, significantly reducing manual configuration effort and improving deployment consistency.
- Built CI/CD pipelines with GitHub Actions and Docker, streamlining release cycles and enabling faster, more reliable deployments.
- Deployed and operated containerized applications on Kubernetes (EKS), managing multiple services and pods in a production-like cluster.
- Implemented monitoring and alerting with Prometheus and Grafana, greatly improving system visibility and speeding up incident detection.
- Configured Apache web servers and SSL (Certbot) across multiple Ubuntu-based Linux servers.
- Designed cloud/DevOps architecture diagrams (draw.io), maintained at: github.com/AryanSharma2206

DevOps & Cloud Projects

CI/CD Pipeline Automation – github.com/AryanSharma2206/website-CI-CD-terraform

- Automated infrastructure provisioning and deployment workflows using Terraform and GitHub Actions.

Kubernetes Hosting on AWS EKS – github.com/AryanSharma2206/AWS-EKS-Hosted-website

- Hosted and managed a containerized application on AWS EKS using Helm charts and GitHub Actions CI/CD.

Monitoring Stack Setup – github.com/AryanSharma2206/Prometheus-Grafana-System-Monitoring

- Implemented infrastructure monitoring and alerting for Linux servers and cloud workloads using Prometheus and Grafana.

DevOps Architecture Diagrams – github.com/AryanSharma2206/AWS-Artitecture-Digram-Hands-on

- Designed detailed DevOps and cloud architecture diagrams for scalable AWS environments.

Education

Poornima University, Jaipur, India

2023 – 2027

B.Tech in Computer Science (AI & Data Science)

Cumulative GPA: 7/10

Certifications & Training

Certificate Repository: github.com/AryanSharma2206/Certificates_achieved-

- Oracle Cloud 2025 Certified DevOps Professional (Official)
- Google Cloud Launchpad 2026 (Official)
- AWS Cloud Practitioner Training – Udemy
- Docker & Kubernetes Fundamentals – Udemy
- Python for DevOps and Automation – Udemy
- Cloud Observability & Operations – LinkedIn Learning
- Power BI – LinkedIn Learning
- AWS: Monitoring, Logging, and Remediation – LinkedIn Learning
- Prometheus and Grafana: Visualizing Application Performance – LinkedIn Learning
- Cloud Architecture: Design Decisions– LinkedIn Learning
